leading the quest for smart energy solutions

Are you **paying over \$400 a month** for your utility bills?

Do you have a plan to cut those bills from **25 to 50%**? **We do.**

To see a full line of energy efficiency products first-hand, visit the world's first energy efficiency store™ on Knox Street in Dallas.

Hear the Current Energy Report every Saturday from 5:00 to 6:00 PM on 570 KLIF. Stay on top of new trends and technologies to save you money.

Benefit from deregulation. In January 2002 electrical deregulation became effective in Texas. How have you benefited? Current Energy will show you several ways to save money in the current environment.

You can spot great sales on clothing, and you can find coupons for food and consumable goods. But saving money on utility bills is a little more complex. That is, until now.

Current Energy has created one place where you can learn about energy-efficient solutions, shop for products that save you money, and find service providers for all your energy-related home systems. Our comprehensive approach to energy products and services works no matter what your budget. And you'll save money while helping the environment. That's a tough combination to beat.

### What solutions make sense for you?

**Home Efficiency Audit.** Learn how to save up to 50% on your energy bill when our experienced consultants provide your comprehensive audit report detailing money-saving solutions. Explore ways to get more from your air conditioning and irrigation systems, and discover how to improve your indoor air quality.

**Heating and Air Conditioning.** 59% of your home's electricity and gas consumption is for heating and air conditioning. The average household's air conditioning system is only operating at 57% efficiency. Let us help!

**Energy Providers.** Whether you're interested in better pricing or green energy, we've researched vendors that meet your needs. Check out the best energy providers available to you.

**Energy-Efficient Products.** Current Energy can help you with a variety of product solutions.

### Ask us about:

Radiant barriers to reduce attic temperatures up to 50 degrees in the summer.

Solar screens or window film to block up to 99.3% of UV lighting.

Insulation to increase efficiency up to 30%.

Tankless water heaters to reduce your water and gas usage up to 70%.

Educational Resources. Just want a place to research energy solutions available? We have materials for you and your children. Come visit us to explore your options.

Your home is a whole system. To save the most money on your utility bills and minimize your impact on the environment, review your entire home before making major changes. Be proactive and research solutions to determine where you'll get the most bang for your buck. Current Energy is here to help.

### HEAR FROM OUR CUSTOMERS.

"While Current Energy performed an indoor Air Quality audit, they found a dangerous gas leak in my home. They repaired the leak and saved my family from a potentially hazardous situation."  
— JANNA L. OF DALLAS

"Current Energy provided outstanding customer service. I would recommend them to anyone. My consultant was very helpful, a true professional who gave phenomenal personalized service."  
— TERRI G. OF DALLAS
